

SURGERY GROUND RULES

- 1. PACKAGE OR GLOBAL FEE CONCEPT:** Listed surgical procedures include the surgery itself, local anesthesia, metacarpal/digital block, or topical anesthesia when used, and normal, uncomplicated follow-up care. The Unit Values for all procedures in this section applies to this "package" or "global" service for surgical procedures. To report a postoperative follow-up for documentation purposes only, use 99024 (see Special Services and Reports Section). For preoperative visits, see Ground Rules 3 and 4 below; see the respective Anesthesia Ground Rule pertaining to anesthesia administered by other than an anesthesiologist or anesthetist.
- 2. OPERATIVE REPORT AND BILLING:** A bill for an operative procedure shall be deemed properly submitted **only if** an operative report or an informative description of the surgery performed is received by the payer. If surgery was performed in a hospital or an ambulatory surgery center, a copy of the hospital's or ambulatory surgery center's operative report will suffice. If surgery was performed at some other site and classified as minor surgery, such as at a physician's office, identify the (geographic) location and submit an informative description of the surgery performed.
- 3. IMMEDIATE PREOPERATIVE VISITS AND OTHER SERVICES BY THE SURGEON:** Under most circumstances, including ordinary referrals, the immediate preoperative visit in the hospital or elsewhere that is necessary to examine the patient, or to initiate the treatment program, is included in the Unit Value listed for the surgical procedure.
- 4. SEPARATE PREOPERATIVE CHARGES:** Charges for separate preoperative procedures are sometimes warranted and may be billed under the following circumstances:
 - a) when the preoperative visit is the initial visit (e.g., an emergency) and prolonged detention or evaluation is required to prepare the patient, or to establish the need for and type of surgical procedure.
 - b) when the preoperative visit is an initial consultation, as defined in the Medicine Section of this manual.
 - c) when procedures not usually part of the basic surgical procedure (e.g., myelography prior to laminectomy, bronchoscopy prior to chest surgery) are provided during the immediate preoperative visit.
- 5. FOLLOW-UP CARE FOR DIAGNOSTIC PROCEDURES:** Follow-up care for diagnostic procedures (e.g., endoscopy, injection procedures for radiography) includes only that care related to recovery from the diagnostic procedure itself. Care of the condition for which the diagnostic procedure was performed or of other concomitant conditions is not included and may be billed separately.
- 6. MULTIPLE OR BILATERAL PROCEDURES:** Multiple related procedures shall not warrant an additional fee except in those subsections of the listings where separate codes are given. When more than one identifiable surgical procedure or service is rendered, an additional fee may be warranted. Identify each procedure and bill at full value for the **major** procedure and at 50% for the lesser procedure, up to a total maximum of twice the greater fee (e.g., unsuccessful closed reduction of a fracture followed on a different day by open reduction).

When multiple procedures, unrelated to the major procedure and adding significant time or complexity are provided at the same operative session, payment is for the procedure with the highest allowance, plus half of the lesser procedure up to a total maximum allowance of twice the highest fee.

When bilateral procedures are performed that require preparation of separate operative sites (e.g., bilateral carpal tunnel), payment for the second (or bilateral) procedure is to be reimbursed at 75% of the primary procedure.

SURGERY GROUND RULES

MULTIPLE/BILATERAL EXAMPLES:

Related Procedures.

- a) Open reduction of a fracture: the excision of a previous scar, the incision of fascia and muscle, the identification and retraction of nerves, muscles, and area structures, and the closure of the wound (irrespective of type of closure) are all related to the principal procedure of the bone repair and merit **no** additional fee.
- b) Repair of a tendon: the skin incision and linear closure, as well as the identification, incision and retraction of adjacent or overlying structures are related to the principal procedure and merit **no** additional fee.

Unrelated Procedures.

- a) Multiple lacerations of an area such as the face: an additional fee may be warranted when such lacerations are not continuous.
- b) Closure of an incision or laceration incidental to the repair of deeper structures such as nerves, tendons, etc., does **not** merit an additional fee irrespective of the method of closure.

7. **ADD-ON CODES:** Certain codes, by the nature of their description and the unit values assigned, have already been reduced, as they are not to be billed as primary procedures. For a complete list of the codes which are considered to be add-on codes, refer to the appropriate appendix found within the most recent publication of the **AMA Current Procedural Terminology (CPT)**.
8. **CODES THAT ARE NOT CLASSIFIED AS ADD-ON CODES BUT ARE EXEMPT FROM THE MULTIPLE PROCEDURE RULE / MODIFIER -51:** For a complete list of the codes which fall into this category, refer to the appropriate appendix found within the most recent publication of the **AMA Current Procedural Terminology (CPT)**.
9. **CODES WHICH INCLUDE CONSCIOUS SEDATION:** Certain codes include conscious sedation as an inherent part of providing the procedure. For a complete list of codes that include conscious sedation, refer to the appropriate appendix that is found within the most recent publication of the **AMA Current Procedural Terminology (CPT)**.
10. **FOLLOW-UP OR AFTERCARE:** Follow-up care for therapeutic surgical procedures includes all normal postoperative care, that care which is usually a part of the surgical service. Complications, exacerbations, recurrence of the condition, or the presence of other diseases or injuries requiring additional services concurrent with the procedure may warrant additional charges. If such separate charges are made, explain by report with an adequate description. When an additional surgical procedure is performed during any follow-up care and is related to the previously performed procedure but is not an intrinsic part of the latter, the additional procedure will be paid at one-half the maximum allowable payment.

The column headed "FUD" reflects the amount of days that would be applicable for the particular type of surgical procedure and/or service provided. Note that some procedures show the "FUD" as being XXX, YYY, or ZZZ. The following definitions, which correspond with the Medicare Fee Schedule, are incorporated within this fee schedule:

XXX = Reflects that the global surgery concept does not apply to these codes.

YYY = Reflects that the global period (FUD's) are to be set by the carrier.

ZZZ = Reflects that the codes are an add-on service and are to be treated in the global period (FUD's) of the other procedures that are billed in conjunction with the ZZZ code.

SURGERY GROUND RULES

- 11. SEPARATE PROCEDURE:** Some of the procedures or services listed are commonly carried out as an integral component of a total service or procedure and are identified by the inclusion of the term "separate procedure." The codes designated as "separate procedure" should not be reported in addition to the code for the total procedure or service of which it is considered an integral component.

However, when a procedure or service that is designated as a "separate procedure" is carried out independently or considered to be unrelated or distinct from other procedures/services provided at that time, it may be reported by itself, or in addition to other procedures/services by appending modifier -59 to the specific "separate procedure" code to indicate that the procedure is not considered to be a component of another procedure, but is a distinct, independent procedure. This may represent a different session or patient encounter, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries).

- 12. PRIMARY, SECONDARY, OR DELAYED PROCEDURES:** A **primary** procedure is one that is attempted or performed for the first time, irrespective of the relationship to the date of injury or the onset of the condition being treated. **Secondary** refers to a procedure performed when a condition has been previously treated. For example, where a tendon is lacerated and it is elected to close the laceration without suturing the tendon, the first direct repair of the tendon would constitute a delayed but primary repair. In this example, if the first repair is unsuccessful, any subsequent repair of the tendon would be a secondary procedure. Secondary procedures lie within the content of service. **Delayed** procedures have the same Maximum Allowable Fee as the primary procedures.

- 13. PROCEDURES LISTED WITHOUT SPECIFIED MAXIMUM ALLOWANCE:** "BR" in the Unit Value column indicates that the amount charged for this service is to be determined "by report" because the service is too unusual or variable to be assigned a Unit Value. Pertinent information should be furnished concerning the nature, extent, and need for the procedure or service, the skill and equipment necessary, etc., using any of the following as indicated:

- Diagnosis (postoperative), pertinent history, and physical findings
- Size, location, and number of lesions or procedures where appropriate
- Major surgical procedure accompanied by an additional procedure
- The closest similar procedure by code number and the associated Unit Value, if possible
- Operative time

- 14. UNLISTED SERVICE OR PROCEDURE:** When an unlisted service or procedure is performed, the procedure should be identified and the amount charged substantiated "by report" (BR). Unlisted service or procedure codes usually end in "99."

- 15. CONCURRENT SERVICES BY MORE THAN ONE HEALTH CARE PROVIDER:** Charges for concurrent services of two or more health care providers may be warranted under the following circumstances:

- a) Identifiable medical services: Services provided prior to or during the surgical procedure or in the postoperative period are to be charged by the health care provider rendering the service, identified by the appropriate code. Payable fees under this category are unrelated to the surgeon's fee.
- b) Assistant surgeon: Identify the surgery performed by using the respective code number along with the appropriate modifier (-80, -81, or -82) and bill at 25% of the code fee. The code number must coincide with that of the primary surgeon. Assistant surgeon fees are not payable when the hospital provides an intern or a resident staff to assist at surgery.
- c) Two surgeons: Under certain circumstances, the skills of two surgeons (usually with different skills) may be required in the management of a specific surgical procedure. Identify the surgery performed by using the respective code number along with modifier -62. **The total allowable fee may be increased by 25% in lieu of an assistant surgeon's fee.** If the physicians have agreed upon a payment distribution and that agreement is documented and explained in conjunction with the bill, payment is to be made in accordance with the percentage agreed upon.

SURGERY GROUND RULES

In the absence of a prior agreement, the total allowable fee will be divided equally between the two surgeons.

- d) Surgical team: Under some circumstances, highly complex procedures (e.g., open heart or organ transplant surgery) may require the concurrent services of several health care providers, often of different specializations and using various types of complex equipment. These types of services vary widely and a single unit value cannot be assigned. The amount charged should be supported by a narrative report to include itemization of the health care provider, paramedical personnel, and equipment involved. Modifier -66 should be used in this type of situation.
- 16. SURGERY AND FOLLOW-UP CARE PROVIDED BY DIFFERENT HEALTH CARE PROVIDERS:** When one health care provider performs the surgical procedure and another provides the follow-up care, the value may be apportioned between them by agreement. Whether the amount charged is for the procedure, or the follow-up care should be clearly indicated. The "global fee" is not to be increased, but prorated between the health care providers.
- 17. REPEAT PROCEDURE BY ANOTHER HEALTH CARE PROVIDER:** A basic procedure performed by one health care provider may have to be repeated by another. Identify and submit an explanatory note. (See modifier -77.)
- 18. PRORATION OF SCHEDULED FEE:** When the schedule specifies a unit value for a definite treatment and the patient is transferred from one health care provider to another, the applicable Unit Value is to be apportioned between the health care providers. The providers involved shall agree upon the amount of the proration, and shall render separate bills accordingly with an explanatory note.
- 19. MATERIALS SUPPLIED BY HEALTH CARE PROVIDER:** Supplies and materials provided by the health care provider (e.g., sterile trays, drugs) over and above those included with the office visit or other services rendered may be listed separately. The statement of charges will need to reflect any drugs, trays, supplies, and materials provided. Payment shall not exceed the cost of the item(s) to the health care provider plus 25%, or the cost of the item(s) plus \$15.00 per item, **whichever is less**. Use procedure code 99070.
- 20. SURGICAL IMPLANTABLES:** Reimbursement for any single surgical implantable item (e.g. rods, pins, screws, plates, prosthetic joint replacements) and which is made of plastic, metallic, or of autogenous/non-autogenous graft material that reflects a charge of \$250.00 or more, is to be determined by cost to the provider plus a 50% markup above the invoice cost. A copy of the invoice (date of purchase within twelve months of implantation) must be submitted with the bill.
- 21. SURGICAL ASSISTANT:** Non-physician surgical assistants such as physician assistants or registered nurses, who are either certified or licensed by the Kansas State Board of Healing Arts, the Kansas State Board of Nursing, or some other comparable State licensing agency, may bill at 10% of the code fee. The code(s) must coincide with those of the primary surgeon who must be identified as the responsible physician. Such services are to be identified by adding modifier -NP to the procedure code. (See modifier -NP).
- Additionally, bills for any surgical services provided by non-physicians such as physician assistants or registered nurses must be submitted on the CMS 1500 or an equivalent form containing the same information. The form must also clearly identify the responsible physician.
- 22. OTHER FEES:** The Unit Values for anesthesia, x-rays, laboratory procedures, consultation and other medical services, and office and hospital visits are listed in the following sections: Anesthesia, Radiology, Pathology and Laboratory, Medicine, Physical Medicine and Rehabilitation, and Evaluation and Management.
- 23. MEASUREMENTS:** When listed with a described procedure, measurements pertain to the **original wounds or defects** before any treatment is effected. The allowable charge includes creation of any additional defect. The necessary preparations for repair do **not** merit an additional charge. The depth of a wound is not a factor in the measurements when the described procedure is stated in terms of length or area.

SURGERY GROUND RULES

24. PROFESSIONAL/TECHNICAL COMPONENTS: When the professional and technical components are furnished by different providers (**inclusive of hospitals and ambulatory surgical centers**), the professional component and the technical component shall be identified by adding either modifier -26 or modifier -TC to the usual procedure number. For surgical procedures, the unit value for the professional component is 60% of the total unit value, and the unit value for the technical component is 40% of the total unit value for the procedure code submitted. See Appendix A - Modifiers for the listing of the modifiers.

Additionally, and except for outpatient services, hospitals and ambulatory surgical centers will continue to be reimbursed at their usual and customary charge less the specified discount as contained within the Hospital/Ambulatory Surgical Center Section of the fee schedule. However, hospitals and ambulatory surgical centers need to amend their billing process to specify, by use of modifiers, when only the technical component or the professional component was provided.

25. MODIFIERS: Procedure codes for surgery may be modified under certain circumstances. The circumstances are to be identified by the addition of a hyphen and the appropriate two-digit modifier code. Refer to Appendix A - Modifiers for a list of modifiers that may be used.

26. COST CONTAINMENT: Nothing in this section shall preclude an employer (or insurance carrier) from entering into payment agreements to promote the continuity of care and the reduction of health care costs. Such payment agreements, if less, will supersede the limitation amounts specified herein. Please refer to K.S.A. 44-510i(e) for further clarification, if necessary.
